SUBJECT: Dock Construction, Cumberland River Mile 126.0, Right Bank

Construction Products Inc. of Tennessee has begun construction of a courtesy dock at the subject location. The activity consists of constructing one 220-foot long concrete courtesy dock to be used for short-term moorage of recreational boats. The dock will extend approximately 50 feet from the waters edge.

The majority of the equipment associated with this project will be land-based. However, a small boat will be used to position and connect the dock and provide access to the dock for workers. Work will be performed during daylight hours, Monday through Friday. Construction is expected to be completed in approximately thirty (30) days.

Vessel operators transiting this area are requested to reduce speed and hold a safe distance off this site to reduce the possibility of their vessel's wake causing equipment damage or personal injury.

FOR THE DISTRICT ENGINEER:
